[SECTION LABEL]

[Main headline: keep it under ten words]

[By name]

Replace this text with your main story. Click in a paragraph and start typing. When you paste from elsewhere, use Paste > Keep Text Only so the newsletter keeps its own look.

Text flows from the left column into the right column and on to the next page by itself. You never need to link text boxes as you did in Publisher.

[Caption: who is in the photo and what is happening. Right-click the picture and choose Change Picture. Only use photos of children with permission.]

Headlines use the Heading 1 style, the small label above a headline uses Kicker, and the line under a headline uses Byline. You will find them all in the Styles gallery on the Home tab.

To change the look of every headline at once, right-click Heading 1 in the Styles gallery and choose Modify. The same works for every style.

[A short quote from the story, in the Quote style, to catch the eye]

[SECTION LABEL]

[Second story headline]

[Your second story. Keep paragraphs short: three or four sentences read well in narrow columns.]

[Add as many stories as you need. Copy a headline and its paragraphs, paste them below, then type over them.]

[A shorter item]

[Use this space for a short item, a thank-you or a volunteer request.]
